SANKARAPANDIAN BALAMURUGAN

Senior Product Designer | Senior UI/UX Designer

Chennai, India | +91 6381946117 | sankarapandianbalamurugan@gmail.com

PROFESSIONAL SUMMARY

Senior Product Designer with 8 years of experience delivering enterprise web and mobile products across E-commerce, HRMS, and FinTech. Skilled in end-to-end UX, user research, usability validation, workflow optimization, design systems, and leading a four-member design team. Built two AI-assisted frontend applications.

PROFESSIONAL EXPERIENCE

Codesculpt Innovations | Chennai | October 2022 – Present

Senior UI/UX Designer

- Own end-to-end UX/UI design for enterprise web and mobile products, from requirements and user flows to prototypes, usability validation, and developer handoff.
- Lead UX delivery for complex e-commerce workflows spanning inventory, dead stock, stock allocation, affiliate and influencer management, and analytics.
- Led a four-member team on an HRMS dashboard, overseeing the Workshop, Feedback, WFH, and Bookshelf modules, design reviews, and delivery quality.
- Redesigned HRMS employee feedback through user-side testing and usability reviews, replacing generic comments with competency-specific ratings and feedback for leadership, product thinking, and other criteria.
- Earned A+ grades in every quarterly performance review during 2025 and in completed quarters of 2026.
- Designed FinTech onboarding journeys and financial dashboards; maintained reusable design components and tokens while partnering with product managers and developers.

Macappstudio Pvt Ltd | Chennai | October 2018 – October 2022

UI/UX Designer

- Independently owned UX/UI design across 15+ web and mobile projects, including user flows, wireframes, visual design, and interactive prototypes.
- Collaborated directly with developers to clarify interactions, review implementation, and maintain design consistency through delivery.
- Created client-facing proposal mockups and concept designs to demonstrate mobile app direction and support project approvals and onboarding.

INDEPENDENT AI-ASSISTED PROJECTS

SubTrack | Subscription Management App

Designed and built a responsive subscription-management frontend with AI-assisted development using HTML and CSS. Includes recurring billing schedules, upcoming payment tracking, and spending analytics.

View SubTrack project

Expense Tracker | Personal Finance App

Designed and built a responsive personal finance frontend with AI-assisted development using HTML and CSS, including transaction tracking, category-based expense management, and spending insights.
